1. Introduction

1.1. About your proposal

All documentation relative to the call is provided on the following LEAP-RE website page: <http://www.leap-re.eu/>.

Prior to submission, the project coordinator must prepare a **project proposal document**, to be submitted in PDF format document following the template available on the call page¹.

Some agencies require additional documents (check on appendix IV) to be included in the submission documents for the international submission. Please make sure that you and your partners check the appendices of your corresponding agencies regarding additional documents, in order to ensure the acceptability of your proposal. The templates of these documents are available on the call page.

Keep in mind that each funding organisation has its own funding criteria and regulations, which are mentioned in the call announcement.

1.2. About the submission system

The LEAP-RE Call 2022 electronic submission system is based on the French National Research Agency (ANR) electronic submission platform (<https://aap.agencerecherche.fr/>). The present document is designed to guide you through the submission process and ensure a smooth submission.

➔ Note that some features of the submission platform are not used for this call and that some fields in the interface can be safely ignored.

Each modified page in the submission platform must be saved (using the “Save” button) before going to another page.

1.3. Roles in the submission process

A Consortium is composed of project Partners represented by Lead Researcher (called Principal Investigator on the submission website). The project coordinator creates the proposal in the submission system and adds the other project partners. The partner PIs are automatically informed by email. The email invites them to log into the system in order to complete, check or modify the information provided by the coordinator about the consortium. It is the responsibility of the coordinator to ensure that the partner information is properly filled in. When the proposal is complete, the coordinator can lock it, which prevents the other partners updating their information. Only the coordinator is allowed to modify the project-level information.

¹<http://www.leap-re.eu/>

2. How to connect

The coordinator and the other PIs can connect to the website in the following way.

2.1. Submission website

The electronic submission system is available at this URL:
